HandsOn GroupWork

The VMA – Day 2

Alfred Bach
Principal Technical
Instructor

Afternoon Agenda

- 13:30 Introduction to HandsOn exercise
- 14:30 Start HandsOn GroupWork
- 16:45 Wrap-up and next steps
- 17:00 End of Day 2 sessions

Where We Are on Day 2

- Morning: Day 1 Showtime presentations
- VDI on OpenShift-V covered
- VMware environment analysis practiced
- Risk analysis and estimation completed

Session Objectives

- Perform a partner-led VMA assessment
- Apply technical discovery on a scenario
- Conduct migration risk assessment
- Produce assessment findings and recommendations

Day 1 vs. Day 2 Group Work

- Day 1: High-level estimation
- Day 1: CxO presentation draft
- Planning and positioning focus
- Based on provided scenario brief

- Day 2: Full VMA assessment
- Day 2: Technical discovery deep-dive
- Risk analysis with real data
- Hands-on partner delivery simulation

The Exercise

Workshop Scenario Repository

- [VMA-ILT workshop folder on GitHub]
- Three real-world customer scenarios
- Each group receives one scenario
- Customer brief plus RVtools export

Three Customer Scenarios

Hospital
Free Hospital London
Large healthcare estate

Campervan
Campervan Insurance
Mid-size insurance firm

Truckrepair
Truck Repair Ldt
Enterprise multi-site fleet

Scenario 1: Free Hospital London

- 483 VMs, 25 hosts, 3 clusters
- 186 TiB NFS – Linux-dominated estate
- CEO seeks VMware alternative (NGO end)
- IT lead wants container support for AI

Scenario 2: Campervan Insurance

- 44 VMs, 4 hosts, 2 clusters
- 24 TiB NFS – mixed Linux and Windows
- CFO concerned about licensing costs
- Wants architecture, hardware, and roadmap

Scenario 3: Truck Repair Ldt

- 728 VMs, 70 hosts, 8 clusters
- 736 TiB NFS and VMFS storage
- CTO faces 2026 VMware renewal hike
- Exchange, SharePoint, SQL, Linux apps

Your Data Pack

- Customer Description (.docx) – business context
- RVtools export (.xlsx) – technical inventory
- Use RVtools for discovery and analysis
- Download from your scenario subfolder

Group Roles

- Lead Consultant – owns deliverables
- Technical Analyst – discovery and inventory
- Risk Assessor – complexity and risk matrix
- Business Advisor – value and CxO messaging

Required Deliverables

- Environment inventory summary
- Workload classification and risk matrix
- High-level migration effort estimate
- PoC scope recommendation with rationale

VMA Assessment Steps

Step 1: Engage and Scope

- Review customer brief and stakeholders
- Confirm assessment scope and boundaries
- Agree success criteria with the customer
- Identify data sources for discovery

Step 2: Discover

- Analyse RVtools export per scenario
- Map storage, network, and dependencies
- Document OS versions and integrations
- Note compliance and SLA requirements

Step 3: Assess Risk

- Classify workloads: easy, medium, hard
- Score migration risks per workload
- Flag blockers: GPU, licensing, latency
- Apply morning risk analysis framework

Step 4: Recommend

- Prioritize workloads for migration waves
- Scope a focused OpenShift Virt PoC
- Estimate effort: person-days per wave
- Draft executive summary of findings

During the Exercise

Tools and Resources

- [VMA-ILT workshop scenarios on GitHub]
- [VMA Service Kit on Portfolio Hub]
- RVtools export and customer brief
- Facilitators available for coaching

HandsOn Timeline

- 14:30–14:50 Engage and scope
- 14:50–15:30 Discover the environment
- 15:30–15:45 BREAK
- 15:45–16:30 Assess risk and recommend
- 16:30–16:45 Finalize deliverables

Success Criteria

- Discovery backed by scenario data
- Risk ratings justified per workload
- PoC scope is specific and realistic
- Executive summary is CxO-ready

Facilitator Support

- Raise hand for facilitator coaching
- Checkpoints at each step milestone
- 15-minute warning before finalize
- No spoilers – guide, don't solve

Looking Ahead

Day 3 Showtime

- 09:30 Present your assessment findings
- 10 minutes per group plus Q&A
- Peer feedback on approach and rigor
- Best practices shared across groups

Key Takeaways

- VMA is learned by doing, not watching
- Discovery and risk drive good recommendations
- Partner delivery requires structured methodology
- Today's work feeds tomorrow's Showtime

Let's Begin

Form groups, pick your scenario. HandsOn at 14:30.
