

VMA Process

Introduction Workshop 1 – Day 1

Alfred Bach

Principal Technical Instructor

Session Agenda

- | | | |
|----|--|---|
| 01 | What is the VMA? |  |
| 02 | Why customers need an assessment |  |
| 03 | VMA process at a glance |  |
| 04 | Your role as delivery partner |  |
| 05 | Preview of this afternoon's group work |  |

Where We Are on Day 1

Morning: OpenShift Virt foundations

Just now: MTV and Migration Factory

This session: VMA process introduction

Next: GroupWork estimation and CxO deck

What Is the VMA?

► Delivered by Partners on the customer side.

Virtualization Migration Assessment

Red Hat structured migration assessment service

Evaluates VMware to OpenShift Virt readiness

Combines technical discovery with business value

Delivered by partners on the customer side.

Why the VMA Matters

De-risks migration before major investment

Builds a credible CxO business case

Surfaces technical blockers early

Creates a scoped Proof of Concept path

Surfaces technical blockers early

Creates a scoped Proof of Concept path

VMA AND THE CUSTOMER MOTION

The VMA Process

VMA Process – Five Phases

01

Engage

Scope and align
stakeholders

02

Discover

Map the VMware
environment

03

Assess

Evaluate risk and
readiness

04

Recommend

Define PoC and roadmap

05

Deliver

Present findings to
leadership

Phase 1–2: Engage and Discover

01

Engage

- › Confirm business drivers and success criteria
- › Understand compliance and operational constraints

02

Discover

- › Inventory VMs, workloads, and dependencies
- › Document storage, networking, and integrations

Phase 3–4: Assess and Recommend

Classify workloads
by migration
complexity

Identify risks:
compatibility,
performance, skills

Estimate effort and
timeline at high level

Scope a targeted
OpenShift Virt PoC

Phase 5: Deliver

Compile findings into an executive summary

Present business and technical value clearly

Propose a phased migration roadmap

Define clear next steps for the customer

Your Role

Partner Delivery Model

-  Partners lead the assessment on-site
-  Red Hat provides methodology and enablement
-  Engage ecosystem partners when needed
-  Use the VMA service kit as your guide

VMA Service Kit

[OpenShift Virtualization Assessment](#)

Templates, checklists, and deliverable guides

Reference architecture and best practices

Your starting point after this workshop

How MTV Fits In

MTV migrates VMs to OpenShift Virt

VMA assesses before you migrate

Assessment informs MTV migration planning

Migration Factory scales the motion

What's Next

1. SELECT SCENARIO

Choose from Hospital, Campervan, or Truckrepair repository folders on GitHub.

2. GROUP WORK (15:15)

Analyze data pack (.docx, .xlsx). Create a high-level migration estimation.

3. BUILD PRESENTATION

Develop a CxO-ready presentation. Present findings in Showtime tomorrow.

Workshop Scenario Repository

ACCESS REPOSITORY

VMA-ILT workshop folder on GitHub

CUSTOMER SCENARIOS

Three real-world customer scenarios
Each group receives one scenario for analysis.

INCLUDED MATERIALS

Customer brief plus RVtools export

Everything needed to build a high-level migration estimation.

Three Customer Scenarios

Hospital
Free Hospital London
Large healthcare estate

Campervan
Campervan Insurance
Mid-size insurance firm

Truckrepair
Truck Repair Ltd
Enterprise multi-site fleet

Scenario 1: Free Hospital London

483 VMs, 25
hosts, 3 clusters

186 TiB NFS –
Linux-dominated
estate

CEO seeks
VMware
alternative
(NGO end)

IT lead wants
container
support for AI

Scenario 2: Campervan Insurance

Infrastructure

44 VMs
4 hosts
2 clusters

Storage

24 TiB NFS
Mixed Linux and Windows
environment

Key Concern

CFO is concerned about
licensing costs

Requirements

Architecture
Hardware
Roadmap

Scenario 3: Truck Repair Ldt

- ▶ 728 VMs, 70 hosts, 8 clusters
- ▶ 736 TiB NFS and VMFS storage
- ▶ CTO faces 2026 VMware renewal hike
- ▶ Exchange, SharePoint, SQL, Linux apps

Your Data Pack

- ▶ Customer Description (.docx) – business context
- ▶ RVtools export (.xlsx) – technical inventory
- ▶ Use brief for CxO messaging today
- ▶ Download from your scenario subfolder

Afternoon Group Work Preview

- ▶ Form groups – one scenario per group
- ▶ Create a high-level migration estimation
- ▶ Build a CxO-ready presentation
- ▶ Present findings in tomorrow's Showtime

Key Takeaways

- ▶ VMA de-risks VMware to OpenShift migrations
- ▶ Five phases: Engage through Deliver
- ▶ Three scenarios: Hospital, Campervan, Truckrepair
- ▶ Group work at 15:15 – pick your scenario

Thank You
